

Terms and conditions of use

governing the provision of timetable data (target timetable) for public transport in Switzerland.

1. Current situation

In accordance with the Timetable Ordinance (SR 742.151.4), the Swiss Federal Office of Transport (FOT) is responsible for publishing the official timetables. It may assign responsibility for publication to a suitable company (Art. 10). SBB AG is currently responsible for publishing timetable data. The public aggregate timetable for Switzerland is published on fahrplanfelder.ch using data from the “Info+ timetable” database. SBB AG owns, administers and updates the “Info+timetable” database.

2. Scope of data use

By registering on fahrplanfelder.ch, the data customer receives access to the target timetable data (hereinafter referred to as “raw data”) gathered, prepared and provided free of charge by SBB AG in a machine-readable format in conjunction with the publication of the public aggregate timetable for Switzerland. The data customer may prepare this target timetable data or enhance it using additional data (hereinafter referred to as “prepared data”) and may use this prepared data for analyses and evaluations (hereinafter referred to as “analyses”) and publish it in the form of printed or electronic publications and applications (hereinafter referred to as “publications”).

3. Obligations of data customers

The data customer undertakes to ensure that the prepared data does not paint a false or overly simplified picture of the raw data obtained.

In the case of data prepared for publications, the data customer undertakes to regularly update the underlying raw data in a manner appropriate to its intended use. The data customer undertakes to state the URL “fahrplanfelder.ch” as the reference source in the prepared data, analyses and publications.

If the raw data or data prepared by the data customer is to be passed on to a third party, the data customer shall undertake explicitly to transfer the provisions of these terms and conditions of use to this third party.

4. Liability and warranty

SBB AG accepts no liability for damage or loss of any kind caused by the use of the data. It provides no warranty that the published data is up to date, correct, complete or accurate.

5. Applicable law and place of jurisdiction

This licence agreement is governed by Swiss law. The exclusive place of jurisdiction is Bern.

In the event of discrepancies between the various language versions, the German version shall be binding.
